Skills

Dot Net Core | **C#** | **MVC** | **LINQ** | **REST API** | **WebAPI** | **JSON** | **Ajax** | **React-Native** | **JavaScript** | **HTML5** | **CSS** | **MS SQL Server** | **JQuery** | **Bootstrap** | **Git** | **Bit-Bucket** | **Azure** | **CI/CD** | **Firebase** | **Postman** | **Jira**

Work Experience

Company: Gophyigital Pvt. Ltd.

(Oct 2022 –Present)

Location: Kandiwali, Mumbai

Designation: Dot Net Developer

I developed and maintained web applications using .NET Core (versions 6.0, 7.0, and 8.0) with C# and the MVC framework, focusing on creating robust REST APIs for efficient data transfer. My responsibilities included implementing and managing Git repositories through Bitbucket CI/CD pipelines and utilizing Jira for tracking bugs and feature requests. I also worked with front-end technologies such as HTML, CSS, jQuery, and Bootstrap to enhance user interfaces. Additionally, I integrated payment gateways like AirPay and Razorpay, and managed cron jobs for scheduled tasks within .NET Core applications. Throughout this process, I ensured adherence to best practices in software development and project management.

- **Project#1: Toondemy Academy**

The Toondemy Academy Project includes an admin control website and a React Native mobile app for teachers and parents. The admin panel, built on dot net core 6.0, ensures a secure hub for overseeing educational activities. The app features daily attendance, homework assignments, progress tracking, class calendar management, and student performance assessment for an improved classroom experience.

Played Role: Developer **Team Size:** 5

Areas of Work: Frontend (HTML, CSS, Bootstrap, jQuery, JavaScript), Business Layer (C#), Backend (MS SQL Server), Tools (GitHub, Bit Bucket), Other (Firebase, JWT, CI/CD, IIS Server)

Link: <https://tdacademy.logthis.in>

- **Project#2: AGCX (Adani airport kiosk)**

It's an advanced kiosk system for multiple airports, featuring a user-friendly communication feature that allows direct interaction with agents via calls, enhancing prompt addressing of user queries and concerns.

Played Role: Developer **Team Size:** 2

Areas of Work: Frontend (HTML, CSS, Bootstrap, jQuery, JavaScript), Business Layer (C#), Backend (MS SQL Server), Tools (Azure), Other (FTP, Azure Communication Service)

Company: Adapty Solutions Pvt. Ltd.

(Jul 2021 – Aug 2022)

Location: Thane, Mumbai

Designation: UI-UX Developer

I developed mobile app screens based on Figma designs and addressed bugs reported in Jira. I submitted pull requests to the Git repository daily, ensuring a smooth workflow. Throughout the process, I adhered to optimized coding patterns in React Native, utilizing JavaScript, HTML, CSS, and TypeScript to create efficient and maintainable code.

- **Project#1: Enrichment Beauty App**

Contributed to Enrichment Beauty app development, a React Native e-commerce platform for beauty products and salon bookings. Responsibilities included resolving UI bugs via Jira, ensuring a seamless user experience. Designed and implemented a custom React Native components library to improve reusability and development efficiency.

Played Role:: React-Native Developer **Team Size:** 9

Areas of Work: Frontend (HTML, CSS, JavaScript), Business Layer (React Native),
Backend (Node JS), Tools (GitHub), Other (Jira)
